MANAGEMENT REPORT OF FUND PERFORMANCE

Management Discussion of Fund Performance for the year ended December 31, 2024

This annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can obtain a copy of the annual financial statements at your request, and at no cost, by calling 1 (844) 393-8465, or by writing to us at 4301, 400 – 3 Avenue SW, Calgary, Alberta, T2P 4H2 Attention: Client Services, or by e-mailing us at info@viewpointgroup.ca or by visiting SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's annual financial report, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Caution Regarding Forward-Looking Statements

The annual Management Report of Fund Performance may contain forward-looking statements. Forward-looking statements means disclosure regarding possible events, conditions or results of operations that are based on assumptions about future economic conditions and courses of action and includes any future-oriented financial information ("FOFI") with respect to prospective results of operations, financial position or cash flows that is presented either as a forecast or a projection. FOFI are forward-looking statements about prospective results of operations, financial position or cash flows, based on assumptions about future economic conditions and courses of action.

Forward-looking statements can be identified by the use of forward-looking terminology such as "may", "will", "should", "expect", "anticipate", "target", "project", "estimate", "intend", "continue" or "believe", or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of one of the Fund may differ materially from those reflected or contemplated in such forward-looking information and statements. Material risk factors that could affect actual results are identified under the heading "What are the Risks of Investing in the Fund?" in the Fund's Simplified Prospectus. Investors are also cautioned that forward-looking statements are based on a number of factors and assumptions, including a Fund's current plans, estimates, opinions and analysis made in light of its experience, current conditions and expectations of future developments, as well as other relevant factors. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.

The above-mentioned list of important factors is not exhaustive. You are encouraged to consider these and other factors before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that, unless required by law, the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance. In connection with any forward-looking statements, you should carefully consider the areas of risk described in the most recent simplified prospectus of the Fund. You may obtain these documents from SEDAR+ at www.sedarplus.ca

MANAGEMENT REPORT OF FUND PERFORMANCE

Management Discussion of Fund Performance for the year ended December 31, 2024

This Management Report of Fund Performance represents the portfolio management team's view of the significant factors and developments affecting the investment fund's performance and outlook for the year ended December 31, 2024, the investment fund's annual period. Every effort has been made to ensure the information contained in this Management Report of Fund Performance is accurate and complete, however, the investment fund cannot guarantee the accuracy or the completeness of this material. For more information, please refer to the Viewpoint Global Multi-Asset Trust Simplified Prospectus ("Prospectus"). In this report, "Manager", refers to Viewpoint Investment Partners Corporation. The "Fund" refers to the Viewpoint Global Multi-Asset Trust. In addition, "Trading net asset value" or "Trading NAV" refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based. All dollar figures are reported in Canadian dollars and are expressed in millions, unless otherwise indicated.

Investment Objective and Strategies

The investment objective of the Fund is to achieve long-term capital appreciation with similar volatility to a global balanced mandate by investing in a diversified portfolio of global equities, global bonds, commodities, foreign currencies, and any derivatives that may be necessary for the Fund to achieve its investment objective. The goal of the Fund is to unlock the diversification premium that exists in financial markets, by applying prudent, liquid leverage to an optimally diversified portfolio. The Fund may use leverage through the use of cash borrowings, short sales and derivatives.

To achieve its investment objective, the Fund invests in major global asset classes including equities, bonds, commodities, currencies, and any derivatives that may be necessary. The Fund gains exposure to these asset classes by investing in direct securities, exchange-traded-funds (ETFs), and derivative instruments. Derivative instruments may include futures contracts, option contracts, swaps, and forward agreements. The Fund will provide exposure to both domestic and foreign markets, including emerging markets. The Fund may invest all its assets in foreign securities. The Fund may hold a large proportion of its assets in cash, money market mutual funds, domestic or foreign treasury securities, or other cash equivalents, some of which will serve as margin or collateral for the Fund's investments. As part of its investment strategy, the Fund may obtain indirect exposure through futures contracts, or ETFs where the underlying exposures are futures contracts, to digital assets, including cryptocurrencies such as, but not limited to, bitcoin or ether. The Fund may deliver portfolio assets to its futures commodities merchants to secure its obligations under futures contracts.

The Manager uses traditional quantitative methods, as well as machine learning tools, to build an optimally diversified portfolio of global assets. The asset allocation of the Fund is determined by an algorithmic risk allocation model that is proprietary to the Manager. Asset allocations may be adjusted based on multifactor quantitative overlays including, but not limited to, cross-sectional momentum, time-series momentum, and carry. The Fund may use option contracts within its asset allocation to efficiently manage risk exposure and to keep the 20-day VaR of the Fund within 20% of the Trading NAV of the Fund. A total cost of ownership model is used to select securities suitable to achieve the required asset allocation, a process which includes analysis on how liquidity impacts both explicit and implicit costs to the Fund. Asset allocations are reviewed daily, although changes may occur less frequently. The Fund will be rebalanced on a proprietary cadence, and leverage is managed dynamically in order to achieve the Fund's volatility target.

The strategy seeks to unlock the diversification premium by utilizing prudent, liquid leverage to target a volatility of 8%, a risk level similar to that of a global balanced mandate. The Fund is actively managed to keep volatility at approximately 8% annualized, although there is no guarantee that this target can be met in all market conditions.

VIEWPOINT GLOBAL MULTI-ASSET TRUST

(formerly Viewpoint Global Asset Allocation Trust and before that, Viewpoint Global Fund Trust)

MANAGEMENT REPORT OF FUND PERFORMANCE

Management Discussion of Fund Performance for the year ended December 31, 2024

Volatility is a statistical measure of the average magnitude of changes in the Fund's returns without regard to the direction of the returns. The Fund's actual volatility level for longer or shorter periods may be materially higher or lower than the target level depending on market conditions, and therefore the Fund's risk exposure may be materially higher or lower than the level targeted by the Fund. As portfolio weights and estimates of volatility and correlations change through time, the Manager will increase and decrease the Fund's gross exposure to underlying assets in order to maintain its target level of portfolio volatility. During periods of high volatility and/or high correlations, the Fund may have lower exposure to the underlying assets to maintain the target level of portfolio volatility. Conversely, during periods of low volatility and/or low correlations, the Fund may require greater exposure to underlying assets to maintain its target level of portfolio volatility.

Risk

The risks associated with investing in the Fund remain as discussed in the Prospectus. The Fund is suitable for an investor who is looking for a low to medium risk portfolio of alternative investment strategies to hold as part of their balanced portfolio and has a medium to longer term investment horizon.

For the years ended December 31, 2024 and 2023, there were no changes affecting the overall level of risk associated with an investment in the Fund. Therefore, the overall level of Fund risk and investor risk tolerance remains as stated in the Prospectus.

Leverage

The Fund has obtained exemptive relief from the leverage constraint that generally applies to alternative mutual funds under NI 81-102. Pursuant to that exemptive relief, instead of complying with the leverage constraint generally applicable to alternative mutual funds under NI 81-102, the Fund will use an absolute VaR based risk management approach that allows the 20-day VaR of the Fund to be up to 20% of the Trading NAV of the Fund. This method is used as an alternative to compliance with the leverage constraint that applies to alternative mutual funds in NI 81-102 (i.e., an alternative mutual fund's aggregate exposure to cash borrowing, short selling and the notional value of specified derivative transactions must not exceed 300% of the Fund's Trading net asset value). In addition to limiting VaR, relief is conditional on compliance with several risk management obligations, including the appointment of a Derivatives Risk Manager, the creation of a Derivatives Risk Management Program, external verification of the Fund's VaR calculations and additional reporting requirements. During the year ended December 31, 2024, the Fund's maximum 20-day absolute VaR was 12%.

Results of Operations

For the year ended December 31, 2024, the Fund returned +19.3% compared to the strategy's benchmark S&P Risk Parity 2.0 Index 8% Volatility, which returned +12.7%. The S&P Risk Parity 2.0 Index 8% Volatility seeks to measure the performance of a multi-asset risk parity strategy that allocates predetermined risk among commodities, equity, nominal bonds, and TIPS, while targeting a volatility level of 8%.

For 2024 the Fund's assets grew by \$1 million, a combination of \$29 million of outflows and \$30 million in market growth. Assets under management for the Fund as of December 31, 2024, were \$165 million. It is worthwhile to mention that the net outflows from the Viewpoint Global Multi-Asset Trust have largely been into Viewpoint Enhanced Global Multi-Asset Trust and Viewpoint Diversified Commodities Trust.

VIEWPOINT GLOBAL MULTI-ASSET TRUST

(formerly Viewpoint Global Asset Allocation Trust and before that, Viewpoint Global Fund Trust)

MANAGEMENT REPORT OF FUND PERFORMANCE

Management Discussion of Fund Performance for the year ended December 31, 2024

It is prudent to highlight the portfolio turnover calculation as per the regulatory requirement is different than what the Fund may experience in practice, and comparability to other investment funds may be limited. The Fund achieves its investment objective by investing in direct securities, exchange-traded-funds (ETFs), and derivative instruments. Given futures contracts are not included in the portfolio turnover calculation, the standard calculation may be of limited use. In addition, should the Fund have any excess collateral resulting from the use of futures contracts, it will utilize short-term domestic treasury securities for cash management purposes but must roll this collateral on a monthly basis. The rolling of short-term domestic treasury securities has an immaterial impact on trading costs for the Fund, however the rolling of these securities inflates the turnover statistics of the Fund.

Portfolio Review

December saw decent performance for Viewpoint Global Multi-Asset Trust during a volatile month, with a monthly return of +0.1%, handily outperforming the benchmark RPAR 8% Risk Parity Index (-2.8%) and in-line with S&P Risk Parity 2.0 Index – 8% Volatility Target (+0.5%). Note that the benchmark is a risk parity index that does not include management fees, slippage, or other costs. On the whole, 2024 was a banner year for the strategy, with a return of +19.3%, which outperformed both the S&P Risk Parity benchmark (+12.7%) and the global balanced portfolio (+18.3%).

The biggest positive contributors to the Fund return during December were Japanese Equity (+0.2%), Grains (+0.2%), and German Bonds (+0.07%), while the negative contributors were U.S. Bonds (-1.1%), U.S. Equity (-0.8%), and E.M. Bonds (-0.3%). During the year, the strategy allocated from equity (-6.3%) into fixed income (+6.4%), both nominal (+6.3%) and inflation-linked (+0.9%). Commodity exposure remained mostly constant from 2023. Notional exposure was approximately between 100% (no leverage) and 200% (2X leverage) during the year and averaged 150%. The amount of leverage we apply to the portfolio, similar to Viewpoint Enhanced Global Multi-Asset Trust, is contingent on the volatility forecast of the underlying portfolio, which takes market conditions into account.

Recent Developments

In June 2024, we redesignated the fund codes VWP201 and VWP205 (from Series I/I-USD to Series V/V-USD). At the same time, we issued new series I/I-USD units with fund codes VWP202 (CAD) and VWP203 (USD).

In December 2024, we updated the settlement cycle for subscriptions or redemptions of units of the Fund to T+1 (from T+2) in keeping with North American capital markets.

Related Party Transactions

During the year ended December 31, 2024, the Fund incurred \$261,194 (December 31, 2023 - \$55,931) in cost reimbursements to the Manager.

As at December 31, 2024, \$216,247 (December 31, 2023 - \$205,594) relating to investment management fees and \$16,450 (December 31, 2023 - \$51,590) relating to cost reimbursements are recorded as management fees payable and accounts payable and accrued liabilities, respectively.

During the year ended December 31, 2024, the Fund incurred \$8,421 (December 31, 2023 - \$7,033) in financial administrative costs to a company wholly owned by a director of the Manager. As at December 31, 2024, \$8,421 (December 31, 2023 - \$7,033) relating to financial administrative costs are recorded as accounts payable and accrued liabilities.

(formerly Viewpoint Global Asset Allocation Trust and before that, Viewpoint Global Fund Trust)

MANAGEMENT REPORT OF FUND PERFORMANCE

Management Discussion of Fund Performance for the year ended December 31, 2024

All amounts above include sales taxes unless otherwise noted.

As of December 31, 2024, 288,629 (December 31, 2023 – 351,205) Class A, Series V and O units in the Fund were held by a director, or related party, of the Trustees of the Fund or the Manager.

There were no commissions, spreads or other fees paid by the Fund to any related party.

Management fees:

In consideration for their services, the Fund shall pay the Manager an annual fee equal to 0.45% of the Trading NAV of Series V and Series V-USD units of the Fund, 0.85% of Series I and I-USD units of the Fund, and 0.95% of the Trading NAV of Series F and Series F-USD units of the Fund. For the Series V, Series V-USD, Series I and Series I-USD units, the fee is calculated at the beginning of each week based on Trading NAV of the respective series of units of the Fund as at the end of the immediately preceding week in any year and payable quarterly in arrears. For the Series F and Series F-USD units, the fee is calculated daily based on the Trading NAV of the respective series of units of the Fund as at the end of the immediately preceding day in any year and payable quarterly in arrears. No annual fee was paid to the Manager for Series O and Series O-USD units of the Fund. During the year ended December 31, 2024, the management fees incurred by the Fund amount to \$842,440 (December 31, 2023 - \$286,865).

The following tables show selected key financial information about the Class A, Series F, Series F-USD, Series V, Series V-USD, Series I, Series I-USD, and Series O units of the Fund, respectively, and are intended to help you understand the Fund's financial performance for the past year since the inception date.

Notes:

- (1) This information is derived from the Fund's financial statements for the years ended December 31, 2024 and December 31, 2023, and is not a reconciliation of beginning and ending net assets per unit.
- (2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/(decrease) from operations is based on the weighted average number of units outstanding over the financial period.
- (3) Distributions were paid in cash or automatically reinvested in additional units of the Fund, or both.
- (4) This information is provided as at December 31, 2024 and December 31, 2023.
- (5) Management expense ratio is based on total expenses (excluding distributions, commissions, and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average NAV during the year.
- (6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average NAV during the year. Included in the trading expense ratio are the forward fees.
- (7) The Fund's portfolio turnover rate indicates how actively the Fund's advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the units in its portfolio once in the course of the year. The higher a funds' portfolio turnover rate in the year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The Portfolio turnover rate calculation excludes the purchases and sales of futures contract investments.
